

Publications of Gail M. Thornton

Tapper TE, Funakoshi Y, Hariu M, Marchuk L, **Thornton GM**, Ronsky JL, Zernicke R, Shrive NG, Frank CB (2009) ACL/MCL transection affects knee ligament insertion distance of healing and intact ligaments during gait in the ovine model. *Journal of Biomechanics* 42(12):1825-1833

Lo IK, Sciore P, Chung M, Liang S, Boorman R, **Thornton GM**, Rattner JB, Muldrew K (2009) Local anaesthetics induce chondrocyte death in bovine articular cartilage disks in a dose- and duration-dependent manner. *Arthroscopy* 25(7):707-715

Thornton GM, Shao X, Kuchison ME, Marchuk LL, Shrive NG, Frank CB (2009) Healing ligament mechanical properties are improved by repair with interpositional allografts but not by concomitant treatment with hyaluronic acid. *Journal of Orthopaedic Research* 27(3):400-407

Tapper TE, Fukushima S, Azuma H, Sutherland C, Marchuk L, **Thornton GM**, Ronsky JL, Zernicke RF, Shrive NG, Frank CB (2008) Dynamic in vivo 3D kinematics of the ACL/MCL transected ovine stifle joint. *Journal of Orthopaedic Research* 26(5):660-672

Thornton GM, Schwab TD, Oxland TR (2007) Fatigue is more damaging than creep in ligament revealed by modulus reduction and residual strength. *Annals of Biomedical Engineering* 35(10):1713-1721

Thornton GM, Schwab TD, Oxland TR (2007) Cyclic loading causes faster rupture and strain rate than static loading in medial collateral ligament at high stress. *Clinical Biomechanics* 22(8):932-940

Schwab TD, Johnston CR, Oxland TR, **Thornton GM** (2007) Continuum damage mechanics (CDM) modelling demonstrates that ligament fatigue damage accumulates by different mechanisms than creep damage. *Journal of Biomechanics* 40(14):3279-3284

Tapper JE, Fukushima S, Azuma H, **Thornton GM**, Ronsky JL, Shrive NG, Frank CB (2006) Dynamic in vivo kinematics of the intact ovine stifle joint. *Journal of Orthopaedic Research* 24(4):782-792

Thornton GM, Johnson JJ, Maser RV, Shrive NG, Frank CB (2005) Strength of medial structures of the knee joint are decreased by isolated injury to the medial collateral ligament and subsequent joint immobilization. *Journal of Orthopaedic Research* 23(5):1191-1198

Ali AF, Reda Taha MM, **Thornton GM**, Shrive NG, Frank CB (2005) Biomechanical study using fuzzy systems to quantify collagen fibre recruitment and predict creep of the rabbit medial collateral ligament. *Journal of Biomechanical Engineering* 127(3):484-493

Rau MD, Renouf D, Benfield D, Otto DD, **Thornton GM**, Raso VJ, Bagnall KM (2005) Examination of the failure properties of the anterior cruciate ligament during the estrous cycle. *The Knee* 12(1):37-40

Adeeb SM, Zec ML, **Thornton GM**, Frank CB, Shrive NG (2004) A novel application of the principles of linear elastic fracture mechanics (LEFM) to the fatigue behavior of tendon tissue. *Journal of Biomechanical Engineering* 126(5):641-650

Thornton GM, Shrive NG, Frank CB (2003) Healing ligaments have decreased cyclic modulus compared to normal ligaments and immobilization further compromises healing ligament response to cyclic loading. *Journal of Orthopaedic Research* 21(4):716-722

Boorman RS, **Thornton GM**, Shrive NG, Frank CB (2002) Ligament grafts become more susceptible to creep within days after surgery: Evidence for early enzymatic degradation of a ligament graft in a rabbit model. *Acta Orthopaedica Scandinavica* 73(5):568-574

Thornton GM, Shrive NG, Frank CB (2002) Ligament creep recruits fibres at low stresses and can lead to modulus-reducing fibre damage at higher creep stresses: A study in a rabbit medial collateral ligament model *Journal of Orthopaedic Research* 20(5):967-974

Hogervorst T, Howard RA, **Thornton GM**, Paulson K, Shrive NG, Ronsky JL, Frank CB (2002) A potential animal model for creating a controlled and reversible anterior cruciate ligament insufficiency. *The Knee* 9(3):209-214

Thornton GM, Boorman RS, Shrive NG, Frank CB (2002) Medial collateral ligament autografts have increased creep response for at least two years and early immobilization makes this worse. *Journal of Orthopaedic Research* 20(2):346-352

Grassman SR, McDonald DB, **Thornton GM**, Shrive NG, Frank CB (2002) Early healing processes of free tendon grafts within bone tunnels is bone-specific: A morphological study in a rabbit model. *The Knee* 9(1):21-26

Thornton GM, Shrive NG, Frank CB (2001) Altering ligament water content affects ligament pre-stress and creep behaviour. *Journal of Orthopaedic Research* 19(5):845-851

Thornton GM, Frank CB, Shrive NG (2001) Ligament creep behaviour can be predicted from stress relaxation by incorporating fibre recruitment. *Journal of Rheology* 45(2):493-507

Lo IKY, Randle JA, Majima T, **Thornton G**, Rattner JB, Shrive NG, Frank CB, Hart DA (2000) New directions in understanding and optimizing ligament and tendon healing. *Current Opinion in Orthopedics* 11(5):421-428

Thornton GM, Leask GP, Shrive NG, Frank CB (2000) Early medial collateral ligament scars have inferior creep behaviour. *Journal of Orthopaedic Research* 18(2):238-246

Thornton GM, Oliynyk A, Frank CB, Shrive NG (1997) Ligament creep cannot be predicted from stress relaxation at low stress: A biomechanical study of the rabbit medial collateral ligament. *Journal of Orthopaedic Research* 15(5):652-656
